KNOWBRAINER QUICKSTART

Most Popular KnowBrainer Commands

Type <dictation> - Forces dictation anywhere you cannot dictate. Note that the 1st letter of the 1st word will begin with a capital letter. If you prefer your 1st word to begin in lowercase, substitute. This command is used primarily for editing highlighted text. It is true AI that even works in non-Dragon friendly environments

Print <dictation> - Same as Type <dictation> but more bulletproof & only prints in lowercase

Insert <dictation> – replaces selected text and additionally moves the cursor to the end of the paragraph

Paragraph – moves the cursor to the end of the current paragraph and creates a new paragraph

Paragraph <dictation> - moves the cursor to end of the paragraph, creates a new paragraph and allows you to simultaneously dictate

Continue – moves the cursor to end of the paragraph

Continue With <dictation> - moves the cursor to end of the paragraph and permit simultaneous dictation

Copilot <dictation> (Requires Windows 11) Opens Copilot & simultaneously searches for your dictation

Browse <dictation> – Switches focus to your favorite browser, opens a new tab, to the homepage

   Example: Browse <eBay> opens the eBay homepage

Google <dictation> – Switches focus to your favorite browser, opens a new tab, and displays a list

   Example: Google <electric cars> - Switches focus to your favorite browser & searches for electric cars

<Tab/Back Tab/Enter/Space/Delete/Backspace/Left/Right/Up/Down> <1 - 20> presses key 1 to 20 times

   Example: Tab <3> presses {Tab} 3 times

Page <Up/Down> <1-100> - Presses page up or down 1 to 100 times

Zoom <In/Out> <1-20> – (global) Zoom in or out up to 20 times

Now Open <dictation> – opens any application or recently used utility, folder or file

   Example: Now Open <Word> opens "Microsoft Word" & can be used most of the time

   Example 1: Now Open <App> <Excel> - specifically opens "Microsoft Excel"

   Example 2: Now Open <File> <Letter Head> - specifically opens Microsoft Word "Letter Head" file

   Example 3: Now Open <Folder> <Paid> - specifically opens our "Paid" folder

Note that you won't be able to take advantage of the last 4 years of commands until you install and run the new KnowBrainer Commands Updater; (after installing KnowBrainer)
